

# Maneuverability Test

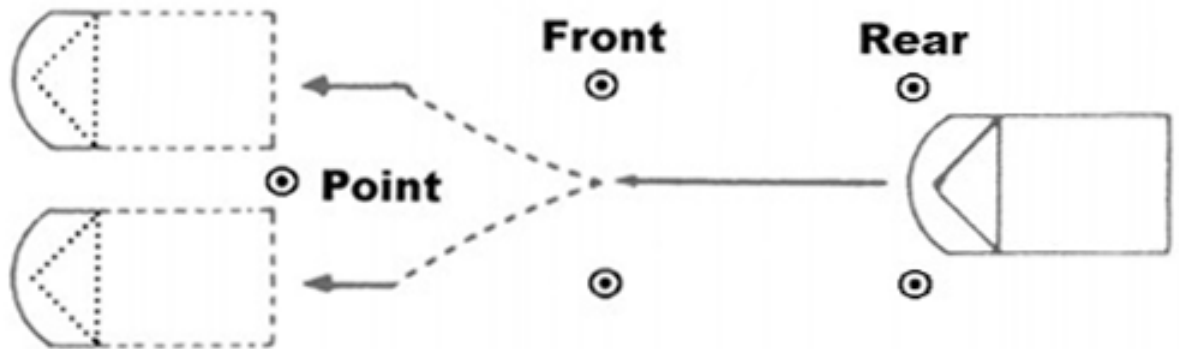

The test conducted in 2 steps. Each step is to be completed in one continuous motion.

- Begin by pulling up to the course and stopping when front bumper is aligned with rear markers
- Pull forward through the course, steering to right or left of point marker (as directed by examiner)
- Steer to a straight ahead course and stop when rear bumper is aligned with point marker and parallel with course
- From your stopped position, you must be able to back past the point marker
- Straighten car and back through the course, come to a stop when front bumper is aligned with rear markers and car is parallel with course
